SIRIL Desincrustante Profissional

APPLICATIONS:

Industrial cleaning in construction, especially in hard stones and cement.
Removal of cement wastes and other debris from construction sites, lime, water paints, rusts, moss, verdigris, etc;
Applicable on floors, stone doorframes, countertops, sills, fireplaces, rim pools, Garden benches, etc..:

PREPARATION OF THE SURFACE:

Remove the accumulated excess of cement and lime with a suitable tool, in order to get better and faster results.

If the surface is greasy, wash it previously with a detergent, because fat can hinder the performance of the product.

HOW TO USE:

To clean cement waste, lime and rust, apply Siril without any water and wait a few while the product acts. Then wash with water. Repeat if necessary.

Dilute one part of Siril in 5 or 6 parts of water for dirty stone surfaces, apply with a stiff brush and then rinse with water.

The performance varies depends on the hardness of the stone. Before applying the Siril we recommend You to make a test on a less visible area, increasing or decreasing the concentration Siril according to the results.

NOTES:

Do not use on polished surfaces or enamel, as it will affect the bright.

Do not use on metal surfaces as it can induce oxidation.

Ventilate the application site. The accumulation of gases can cause stains and rust on existing metals.

FICHA TÉCNICA

COMPOSITION:

Hydrochloric acid < 20%

Non-ionic surfactants < 5%

Corrosion inhibitors.

PHYSICAL AND CHEMICAL PROPERTIES:

- Appearance / Color:	Transparent liquid, orange
- Odor:	Acre
- pH (tal qual, 20°C):	< 1
- Solubility in water, 20°C:	completely soluble
- Solubility in water, 80°C:	completely soluble
- Density, 20°C:	1,046
- Boiling point:	102 °C
- Flash Point:	Not flammable
- aerobic biodegradation	> 60%

SECURITY INFORMATION:

Risk symbols:

Xi

IRRITANT

Hazards: Irritating for the skin and for the eyes. Harmful if swallowed.

Safety Measures: Keep out of reach of children.

Wear gloves when handling. In case of contact with skin, wash with soap and water.

In case of contact with the eyes wash with warm water for 15 minutes, and apply physiological saline and consult an ophthalmologist.

If swallowed do not induce vomiting, drink one or two goals of water and consult Poison Center information by phone.

Do not mix with other products.

Ventilate the application site.

For more detailed information refer to the Safety Data Sheet.

FICHA TÉCNICA

STORING:

Store product in original containers closed and in a cool, dry place. Store away from heat, light incidence and avoid extreme humidity. After usage maintain it vertically, fully covered, preventing leakage.

PRESENTION:

Bottles of 1Lt
Churns of 5Lt and 25Lt

OTHER INDICATIONS:

We guarantee the quality of our products. The recommendations and technical information given in this technical sheet are based on laboratory tests and practical experiences. Due to large variations of materials and conditions of application, we ask that you carry out your own tests by following our indications and directions in order to avoid misconceptions and damages that we are naturally not responsible.
